

SUBSTITUTE SPECIFICATION

STORAGE APPARATUS AND SHIELDING METHOD FOR STORAGE APPARATUS

CROSS-REFERENCES TO RELATED APPLICATIONS

This application relates to and claims priority from Japanese Patent Application No. 2003-390210, filed on November 20, 2003, the entire disclosure of which is incorporated herein by reference.

BACKGROUND OF THE INVENTION

The present invention relates to a storage apparatus and to a shielding method for a storage apparatus.

With the recent advancement of information technology, storage
10 apparatuses and information processing devices, which exist in connection
with storage apparatuses, are becoming higher and higher in performance. To
cope with increases in performance, the storage apparatuses and the
information processing devices have adopted various techniques for
preventing electromagnetic waves from leaking to the outside or entering from
15 the outside.

The storage apparatuses are required to have extremely high reliability,
and so positive interception of electromagnetic waves is particularly important.
For this reason, storage apparatuses adopt various shielding structures for
intercepting electromagnetic waves.
